

# Environmental Consulting & Community Engagement

## Your Partner of Choice.

### Overview.

Kinectrics has a long history of excellence in **environmental analysis, modelling, waste management, and strategy development**. We operate one of the few private laboratories licensed by the CNSC for radiological analysis, as well as a full-service, non-radiological lab. In addition to our laboratories, we have experts in environmental monitoring, environmental protection, risk assessments and strategic planning from siting to decommissioning, we are your lifecycle partner.

Under our **nuclear grade quality program, ISO 17025 and ISO 9001** certifications, we are able to meet any quality standard required for the collection, testing and analysis of environmental samples.

### Stakeholder & Community Engagement.

Successful projects are underpinned by **effective and meaningful engagement** with our customers and the communities they serve. Our approach is simple, collaborative and effective and is lead by some of the **top science communication and education experts** in the industry.

### Technical Experts Dedicated to Supporting the Industry

- Suite of environmental services for existing nuclear sites and new builds
- Regulatory approvals & analysis
- Technical integration
